

## SUSTAINABLE PALM POLICY

Palm oil is an essential food product providing a livelihood for millions of people. As the importance of palm oil in the food chain continues to grow, production of palm oil needs to be managed sustainably to ensure that forests are conserved, communities are respected and workers receive fair treatment.

*(Name of entity)* is committed to sustainable palm oil sourcing and production. We firmly believe it is critical that all parts of the palm oil supply chain – from plantations to retailers – collaborate and act in an environmentally sustainable and socially responsible manner.

We pledge our support of:

- No deforestation of high conservation value (HCV) lands or high carbon stock (HCS) areas
- No planting on peat land
- No exploitation of rights of workers, indigenous peoples, and local communities

We will work to ensure that all our activities and services are governed by our commitment to the above areas.

We will collaborate with and seek the support of all our suppliers and customers for their cooperation and commitment to this policy. We encourage each and every one of them to develop and have in place, similar policies by year 2020. This is to ensure the whole supply chain is fully committed to the promotion of no deforestation, no planting on peat and no exploitation of the rights of workers, indigenous people and local communities.
